Seminar on Tree Conservation and Management

Trees are Our Asset –
The Challenges of Tree Conservation and Management

Background

Trees are an inseparable part of our society; they grow in gardens, parks, campus and other open spaces. With a growing environmental awareness of the people in Hong Kong, the healthy growth of trees and their impact on the environment have become a major concern of our society. It is an arduous task to strike a balance between tree conservation and management, especially in a densely congested living environment. This seminar shall therefore provide a platform for professionals, experts, academics and practitioners to share their knowledge, skills and experiences in arboriculture.
